

Episode 10: Making Dew

Draw a picture of the solar stills that provided drinking water for the crew:

What is wrong with the drinking water?

How much water do you use a day by just sweating and breathing?

- a.) One pint
- b.) One gallon
- c.) Half a cup
- d.) Half of a gallon

True or False:
Salt will freeze with water molecules. _____

What was the point of shooting sea water into the air before letting it settle in the pool area?

Draw a picture of the water experiment C.T. did in the kitchen to show how the red slush melted. Be sure to show what exactly remained at the top, and what was in the bottom of the cup.

What is the big problem with the town of Greenport?
