

# Episode 3: On the Shoals

Draw a picture of how the ocean floor changes the farther you are from land. Be sure to add both light and dark blues.

True or False: The water on the surface is flat and level in all areas.

### Math Question!

If the Mimi is traveling at 5 nautical miles per hour, how long will it take to reach 50 miles?  
\_\_\_\_\_ hours

Select the landforms that you can find underwater:

- Waterfalls
- Deserts
- Cliffs
- Mountains

Draw a picture of what Arthur discovers below deck:

An echo sounder measures how the water is below the boat.

What is a shoal?
