

Episode 8: Tracking the Whale

If the instrument that is tracking the whale is beeping, where is the whale?
At the surface or below the surface?

The barometer on the boat was measuring a lower pressure, what does that mean in terms of weather?

Draw a picture of C.T in wind speeds of 70 mph:

Draw a picture of how the wind travels over the mountain. Then explain why the wind speeds are so high.

If it isn't raining or snowing on the mountain, where did the ice come from?

- Water hose
- Frozen clouds
- Mist from the river below
- Hail from tornados

The walls of the weather station are _____ feet thick.

What do you think will happen to the ship?
